Summary

A Front-End Web Developer with 10+ months of hands-on experience in building responsive and interactive web applications using **React.js**, **JavaScript (ES6+)**, **HTML5**, and **CSS3**. Proficient in implementing RESTful APIs, version control with **Git**, and applying data structures and algorithms to solve complex programming challenges. Skilled in **UI/UX design**, **responsive web development**, and **cross-browser compatibility**. Adept at collaborating in team environments and delivering projects within tight deadlines.

Projects

Padre-ginos
Developed a responsive e-commerce platform for pizza ordering using React and modern frontend architecture
🔗 https://benevolent-gnome-a309a7.netlify.app/

Implemented **user authentication**, **shopping cart** functionality, and **wishlist features** with persistent **state management**

Created **RESTful API integration** for real-time product inventory, pricing, and **order processing**

Built a "**Deals of the Day**" feature to highlight promotions and increase customer engagement

Utilized **React Router** for seamless navigation and **TanStack** for efficient **data fetching** and state management

React, React Router, TanStack, RESTful API, user authentication, API integration, Tailwind css

Ecobazar Organic E-commerce Website
Developed a complete organic products e-commerce platform using React and React Router

Implemented essential online shopping features including **shopping cart**, **wishlist**, and **product catalog**

Created responsive design for optimal user experience across desktop and mobile devices

Built product filtering and search functionality to enhance customer shopping experience

Integrated **checkout system** with form validation for seamless purchasing flow
Utilized **Supabase real-time capabilities** for inventory management and order processing

React, React Router, Supabase Database features: user authentication, database storage, real-time capabilities, Tailwind Css

2048 Game   September 2024
Developed an enhanced 2048 game using Javascript, featuring user authentication, leaderboards, and dashboard functionality with Supabase integration, demonstrating expertise in front-end development and Backend Integration.
🔗 https://www.nikitagoyal.xyz/2048Game/index.html

A web-based **game application** that revolutionizes the classic 2048 experience through **full-stack development**.
Built with **JavaScript ES6+**, **HTML5**, and **CSS3** for the frontend, with **responsive design** ensuring cross-platform compatibility.

Features a secure **user authentication system**, interactive **dashboard**, and **real-time leaderboards** powered by Supabase database integration. **Version control** with Git/GitHub, and **Vercel** deployment.

This project demonstrates advanced **front-end development** skills, **UI/UX design principles**, and **back-end integration** capabilities while delivering an **optimized performance** gaming experience with **state management** for seamless user interactions.

HTML, CSS, Javascript, Supabase, Tailwind Css, Github, Vercel

Catalyst Ui
Designed and implemented Catalyst UI,
🔗 https://tailwind-css-projects-peach.vercel.app/catalystUIKit/index.html

A responsive component library featuring dynamic **dark/light mode** functionality using **Html**, **Tailwind CSS**, **CSS-in-JS**, and **context API** for seamless theme switching.

Demonstrates expertise in **UI/UX design principles**, **component architecture**, and **accessibility standards**.

HTML, Tailwind CSS, GIthub, Javascript, Vercel

Book Finder App
Proficient in Asynchronous Programming and RESTful API integration, with expertise in JavaScript (ES6+) for dynamic data manipulation and presentation. Skilled in creating responsive, modern JavaScript features for clean, efficient code. Demonstrated ability to deliver high-performance web applications, ensuring seamless cross-device compatibility and optimal user experience.
🔗 https://www.nikitagoyal.xyz/bookFinder/index.html

- Developed "Book Finder App" using HTML, CSS, and JavaScript
- Integrated Google Books API for real-time book search functionality
- Implemented features for searching by title, author, or keywords
- Created responsive design for seamless use across devices
- Demonstrated skills in API integration, async programming, and UI/UX design

HTML, CSS, Google Books, JavaScript, Web App

MelodiX
Created an interactive music player using modern JavaScript, showcasing proficiency in DOM manipulation, event handling, and audio API integration.
🔗 https://www.nikitagoyal.xyz/musicPlayer/index.html

Implemented a responsive design using **CSS3 Flexbox/Grid ,Html, javaScript** for cross-device compatibility.

Enabled users to play, pause, and navigate through a curated playlist.

Designed to provide users with a seamless music listening experience.

This project demonstrates the power of front-end technologies in creating an interactive and visually appealing audio player. Users can easily play, pause, and navigate through a curated playlist on SoundWave, enjoying their favorite tracks with just a few clicks.

Music Player, Web App, HTML, CSS, JavaScript, Git
